

One Dashboard Tells All

Brand-Agnostic Universal LabOps Platform

The Elemental Machines dashboard is your manufacturer-agnostic, silo-free nerve center for every metric from every asset across your lab. Access controls make sharing a breeze, while robust data security keeps sensitive metrics out of the wrong hands.

Alerting & Monitoring

Peace of Mind Delivered 24/7

Set custom notifications to receive instant alerts the moment an asset malfunctions, power fails, or a metric falls out of range.

Utilization

See What Gets Used (and What to Excuse)

Monitor your assets, then consult the record to reduce waste and supplement overburdened equipment.

Asset Management

Manage to Optimize, Manage to Inform

Distill data from any asset to a single IoT platform for real time monitoring, informed decision making, and seamless integration with existing systems.

Elemental Calendar

Reserve it. Research it. Retrieve it.

Reserve assets, assign users, and tag protocols for any tool across the lab for free on Elemental Calendar, the only lab equipment reservation software built for LabOps.

Smart Alerts

Now, the Dots Connect Themselves

With Smart Alerts from Elemental Machines, each temperature notification is coupled with its most likely culprit, like excessive door open events, compressor failure, or power loss. And proactive insights mean you'll be tipped off when an asset shows signs of failure, before a keen eye would notice and before it's too late.

About Elemental Machines

Elemental Machines is the leading technology platform for optimizing laboratory operations servicing research, clinical, diagnostic, and quality control labs around the world. We empower labs with ubiquitous data-driven discovery, development, and diagnostics capabilities, seamlessly linking the physical and digital worlds.
