

MLM Biostorage: Full Sample Control - Because Every Sample Matters

Securing biological samples is crucial for achieving reliable study results. Your samples are invaluable. Your lab partner should care about your specimens as much as you do.

As a leading central and specialty laboratory there is no better partner than **MLM** to ensure the integrity and traceability of your samples to provide accurate and dependable analytical results. MLM's labs in Europe and North America have in-house storage facilities, helping to reduce risk during the chain of custody from sample receipt, to the laboratory to (long-term) storage.

Minimized risk, reduced transport costs and precise tracking

20+ years of sample management experience with millions of samples in over **3000 studies** and a track record of **100% accuracy**. Our proprietary, qualified tracking system, MLM Sample Management System® allows samples to be identified and retrieved within **10 minutes** of a request.

- ✓ Full chain of custody of your samples – at all times
- ✓ Automated sample trackers
- ✓ No transport between lab and storage
- ✓ 24-hour temperature monitoring
- ✓ Emergency alerts to staff
- ✓ Redundant freezer availability
