## Your Reliable Partner in Peptide Products

GL Biochem is a world-leading provider of peptide reagents, generic peptides, and custom peptide synthesis services. We have been faithfully serving the biotech and pharmaceutical industries, as well as life science research institutes and universities worldwide for over ten years.

With more than 350 organic chemists engaged in peptide synthesis, plus 180 specialists in peptide purification, GL Biochem is now the largest research grade peptide company in the world. Our diverse range of products include [research grade peptides](#), [cGMP grade peptides](#) and more than 3,000 catalog peptides in stock. Our peptide synthesis capacity has reached 10,000 purified peptides per month and is continuing to expand.

In addition to our well-established manual synthesis technologies, we have also invested in Automated Multiple-Peptide Synthesizers to support our customers' needs in peptidomimetic and drug discovery studies.

## Welcome to the 2009 edition of GL Biochems Peptides Catalogue.

This Catalogue covers over 3,000 catalog peptides, generic peptides and custom peptides offered by GL Biochem. For peptide reagents, please refer to the GL Biochem 2008-2009 Peptide Reagents Catalogue. This catalogue includes over 1,300 peptide reagents such as peptide coupling reagents, peptide protecting reagents, linkers for solid phase synthesis, unusual amino acids and Fmoc-, Boc- and Z-amino acids. If you are interested in any of these products, please contact us.

## Why choose GL Biochem?

### TOTAL CUSTOMER SATISFACTION

With well-trained production and quality control staff and state-of-the-art manufacturing facilities, GL Biochem products and processes are scrutinized and tested in accordance with international quality guidelines to meet our customers' stringent requirements. NMR, MS, TLC, Chiral and RP HPLC, qualitative elemental analysis, water content, specific rotation and other analytical techniques are employed to confirm identity as well as chemical and optical purity. Certificate of Analysis, HPLC chromatogram, Mass spectrum (for peptides) and BSE/TSE-free declaration documents are issued with each product ordered from GL Biochem. TOTAL CUSTOMER SATISFACTION is guaranteed - if you are not completely satisfied, we will happily provide one for one exchange and cover all shipping expenses.

### MOST COMPETITIVE PRICING

For those on a budget, GL Biochem offers the highest quality products at the most competitive pricing. With a total of 350,000 sqf of production and office space, our scale and scope places us in an unbeatable competitive position to meet your quality and budget requirements.

### FAST TURNAROUND

GL Biochem is determined to provide fast delivery to its worldwide customers without compromising on quality. For international door-to-door delivery, we charge a fixed price of only US\$60, which covers shipping, handling, customs and bank fees. You can expect most GL Biochem products to arrive via FEDEX/UPS/DHL/TNT/EMS/AE within three to five days (without customs clearance in most cases) upon receipt of your official purchase order. Low temperature or cold storage delivery options are also available on request.

### NEW PRODUCT DEVELOPMENT STRATEGY

GL Biochem has ten R&D teams engaged in new product development. Equipped with state-of-the-art research facilities, our highly motivated, intelligent, and diligent research scientists regularly provide a wide range of new products for the worldwide scientific community.

### REACHING OUT TO OUR CUSTOMERS

GL Biochem continues to add new items to its product and service offerings. We update our website [www.glschina.com](http://www.glschina.com) regularly and keep customers informed through faxes, regular mail and email. Up-to-date catalogues are also available on our website. We are committed to ensuring that our customers are always well informed about our new products and services.

### How to order

Please use the order form on our website to place your order [www.glschina.com](http://www.glschina.com)

Please email anytime with your requests to [glsyn@mail.online.sh.cn](mailto:glsyn@mail.online.sh.cn)

Please call us on +86-21-61263333. Our working hours are from 8:30 am to 6:00 pm (UTC/GMT +8 hours), Monday thru Friday.

Please send us a fax on +86-21-61263300 or +86-21-61263388

This change is of central importance for peptide recognition by melanoma-specific T-cells, but has no impact on peptide binding to the MHC molecule. It has been shown that the glycosylated form of the asparagines contain peptide is capable of loading onto MHC class I molecules within the endoplasmic reticulum of two melanoma cell lines.</i>	Tyr-Met-Asp-Gly-Thr-Met-Ser-Gln-Val	5mg 10mg 25mg	75.00 125.00 250.00

This peptide shows several biological activities such as simulation of pancreas and gastrontesinal endocrine cell secretion, contraction of extravascular smooth muscle and actions on blood pressure. Bombesin injected intracisternally produces a lowering of basal body temperature in cold –exposed rats. Bombesin and related peptides has been implicated in autoctrine simulation of cell proliferation in human small-cell lung cancer.</i>	Pyr-Gln-Arg-Leu-Gly-Asn-Gln- Trp-Ala-Val-Gly-His-Leu- Met-NH <sub>2</sub>	1mg	43.00

*Cotistatin is a neuropeptide that exhibits strong structural similarity to somatostatin, although it's the product of a different gene. Administration of cortistatin depresses neuronal electrical activity but, unlike somatostatin, induces low-frequency waves in the cerebral cortex and antagonizes the effects of acetylcholine on hippocampal and cortical measures of excitability. This suggests a mechanism for cortical synchronizaton related to sleep.*

<i>Hemorphins are endogenous opioid peptides deived by enzymatic degradation of the blood protein hemoglobin. U-receptor-affinity has been reported for Hemorphin-7 might be involved indirectly (via –endorphin) or directly in the central effects such as analgesia and euphoria observed during and after exercise. Furthermore, it appears that Hemorphin-7 may simulate a release of both growth hormone and prolactin in the male rat.</i>

<b>HIV Integrase Protein Inhibitor(1)</b> Cat #: 52261 C <sub>46</sub> H <sub>55</sub> N <sub>11</sub> O <sub>7</sub> S MW: 906.1 <i>This hexapeptide which was identified using a combinatorial chemical library inhibits virus-encoded integrase (IN) protein-mediated 3'-processing and integration with an IC<sub>50</sub> of 2μM. The peptide is active on IN proteins from other retroviruses such as HIV-2, feline immunodeficiency virus, and Moloney murine leukemia virus, supporting the notion that a conserved region of IN is targeted. The hexapeptide was also tested in the disintegration reaction. This phosphoryl-transfer reaction can be carried out by the catalytic core of IN alone. And this peptide was found to inhibit this reaction, suggesting that the hexapeptide acts at or near the catalytic site of IN. Identification of an IN hexapeptide inhibitor provides proof of concept for the approach, and, moreover, this peptide may be useful for structure-function analysis of IN.</i>	His-Cys-Lys-Phe-Trp-Trp	1mg 2mg 5mg	40.00 68.00 120.00

<i>This activepeptide has been isolated from the skin of a frog of Central and South America: Phyllomedusa sauvagei. Sauvagine belongs to the CRF peptide family. It has been shown that this peptide binds to and activates CRF1 receptors with high affinity and equal potency than CRF. Moreover, although CRF is significantly weaker at the CRF2 receptor, sauvagine retains its high affinity interactions with this receptor subtype.</i>	Gln-Ala-Ala-Asn-Asn-Arg-Leu-

- This chart is price of per residual for most standard peptides. For peptides >30 or < 6 amino acids in length, please contact us. Please note that **substantial discounts are available for larger and regular orders.**
- MS and HPLC analysis and Certificate of Analysis for every peptide are all included. For peptides including D-amino acids, special amino acids or any modifications, please contact us for quotation.
- Peptides are generally delivered within 10-20 days of ordering with 50% deposit. In the unusual case of problems in the synthesis of your peptides, we will contact you about the problems, our proposed solution and the new delivery date in advance of the scheduled delivery.

## Range of Services:

Our staffs are experienced in the synthesis of high quality peptides with various modifications. We can also provide peptides from small scale (mgs) to large scale (kgs)

- Simple to complex
- Linear to cyclized
- Large scale
- Different purity level (desalted, >75%, >80%, >85%, >90%, >95%, >98%)
- Wide variety of modifications (from biotinylation to phosphorylation, to dye labeling, and much more...)
- Peptides labeled with C13 and N15
- Protein Conjugation Services BSA & KLH

## List of Modification

N,C-Terminal Modification	Special Amino acid	Fluorescence/ Dye labeling	Cyclic Peptide	Quenched Fluorescent Peptide	Multiple Antigenic Peptide System	Protein Conjugation
